

30 Minute Solution

Window Cleaner and All Purpose Cleaner. Cuts grease and dries before it streaks.

- 2 Cups Isopropyl Alcohol (Rubbing)
- 1/2 Cup Household Ammonia
- 1 Tsp. Any Brand Liquid Dish Soap
- 12 - 16 Cups Hot Water

Mix alcohol, ammonia, and dish soap in a bucket and add the hot water. Fill 2 spray bottles with solution before you begin cleaning your windows. Keep one bottle for the kitchen and one for the bathroom.

For Window Cleaning: Start with the interior windows using a sponge squeegee (like the ones used at gas stations). Once inside windows are finished, do the outsides.
